PROFILE SUMMARY

Frontend Developer with 3+ years of experience in the React ecosystem including Vite, Tailwind CSS, and React Query. Built 2 full-stack production applications with user authentication, REST API integration, and real-time features. Proven ability to transform design concepts into functional, scalable web applications.

CORE COMPETENCIES

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React 19, Next.js, REST APIs, HTML5, CSS3.
- **State Management & Data:** Redux Toolkit, TanStack Query, React Hook Form, Zod, Context API.
- **Styling & UI:** Tailwind CSS, Bootstrap, Responsive Design, HeroUI, Framer Motion.
- **Development Tools:** Git & GitHub, npm, Vite, ESLint, Vercel.
- **APIs & Libraries:** Axios, React Router, React Icons.

SOFT SKILLS

- Problem solving and analytical thinking.
- Time management and ability to meet deadlines.
- Team collaboration and communication.

TRAINING AND CERTIFICATES

Front-end Web Development Program, Route Academy — September 2025 - February 2026

- Intensive 6-month boot-camp focusing on modern web development technologies.
- Hands-on training in React, Next.js, and TypeScript.
- Built 3+ real-world projects including social media and e commerce (ongoing) applications.
- Learned industry best practices in code architecture, testing, and deployment.

Skills Acquired:

- Front-end: React, Next.js, TypeScript, Redux, Tailwind CSS, Bootstrap.
- Tools: Git, GitHub, Vite, Vercel, Postman.
- Concepts: Responsive Design, Component Architecture, State Management.

Projects:

PostIt - Social Media Platform | **GitHub**: https://github.com/dohahehe/PostIt | **Live**: https://post-it-bhg2.vercel.app/
React, Tailwind CSS, React Query, REST API

- Full-featured social platform serving 20+ test users with authentication, posts, comments, and profiles.
- Real-time updates, responsive design, deployed on Vercel.
- 4 core Features: User auth, post management, commenting system, profile customization.

FreshCart - E-Commerce Platform | **GitHub**: https://github.com/dohahehe/FreshCart | **Live**: https://shop-it-orpin.vercel.app/
Next.js 15, TypeScript, Tailwind CSS, NextAuth.js, React Query, JWT, React Hook Form, Zod, REST API

- Full-featured e-commerce platform with 50+ product listings, cart management, and wishlist functionality.
- Real-time updates, responsive design, deployed on Vercel.
- 6 core Features: User authentication, product search and filtering, shopping cart with quantity management, user reviews with ratings, order history tracking, profile management.

Additional Mini Projects

Game Hub - Game Discovery Platform | **GitHub**: https://github.com/dohahehe/Game-Hub | **Live**: https://dohahehe.github.io/Game-Hub/
JavaScript, Bootstrap, HTML5, CSS3, FontAwesome, RapidAPI

- Modern web application for discovering and exploring free-to-play games.
- Advanced filtering by genre, real-time search with debouncing, responsive design.
- Features: Game discovery, genre filtering, modal details, infinite-scroll pagination.

Weather App | **GitHub:** https://github.com/dohahehe/Weather-App | **Live**: https://dohahehe.github.io/Weather-App/
Bootstrap, JavaScript, WeatherAPI, Geolocation API

- Sleek, responsive weather application providing real-time conditions and forecasts worldwide.
- Geolocation support, city search, multi-day predictions, beautiful UI with weather icons.
- Features: Real-time weather data, geolocation, city search, responsive design, error handling, loading states.

Summer Intern, Suez Canal Authority — August 2024 - September 2024

React Web Developer trainee, Digital Egypt Pioneers Initiative (DEPI) — September 2024 - January 2025

- Completed an intensive government-sponsored training program focused on **web development technologies including HTML5, CSS3, JavaScript (ES6+), React.js, and Node.js**.
- Gained hands-on experience through **practical projects**, including developing a fully functional **online booking and reservation system** with responsive design and user authentication.
- Collaborated in a **team-based environment**, applying **Agile methodologies** and version control (Git/GitHub) for project management.
- Enhanced problem-solving, UI/UX design implementation, and API integration skills, aligning with industry best practices.

Web Developer Certificate, Udacity — March 2023 - May 2025

- Completed training focused on the **fundamentals of HTML5 and CSS3**.
- Gained practical skills in **structuring webpages, styling elements, and creating responsive layouts**.
- Built 5+ static web pages to strengthen understanding of **web design principles and user interface basics**.

EDUCATION

Bachelor of Computer Science in Software Engineering — Suez Canal University - September 2021 - July 2025

- GPA: 3.19 / 4.0
- Graduated with **Excellence with Honors**.
- Coursework included **Software Engineering Principles**, **Web Development**, **Database Systems**, **Algorithms**, and **Data Structures**.
- Strengthened expertise in **full-stack development**, **teamwork**, **Agile methodologies**, and **problem-solving** through academic and project work.
- Graduation Project: **"Yalla Eat"** an Egyptian food delivery and reservation platform inspired by Talabat, built with React.js on the front end and supported by backend APIs. Achieved **A+** for **implementation**, **documentation**, and **presentation**.

IGCSE — September 2019 - September 2021

LANGUAGES

English, Arabic
