PROFILE SUMMARY

Frontend Developer with expertise in React ecosystem including Vite, Tailwind CSS, and React Query. Built responsive social media application with user authentication, REST API integration, and real-time features. Proven ability to transform design concepts into functional, scalable web applications.

TECHNICAL SKILLS

Languages & Frameworks	JavaScript (ES6+), TypeScript, React 19, Next.js, REST APIs, HTML5, CSS3.
State Management & Data	Redux Toolkit, TanStack Query, React Hook Form, Zod , Context API.
Styling & UI	Tailwind CSS, Bootstrap, Responsive Design, HeroUI, Framer Motion.
Development Tools	Git & GitHub ,npm, Vite, ESLint, Vercel.
APIs & Libraries	Axios, React Router, React Icons.

SOFT SKILLS

- Problem solving and analytical thinking.
- Time management and ability to meet deadlines.
- Team collaboration and communication.

TRAINING AND CERTIFICATES

Front-end Web Development Program, Route Academy
September 2025 – present

- Intensive 6-month boot-camp focusing on modern web development technologies.
- Hands-on training in React, Next.js, and TypeScript.
- Built multiple real-world projects including social media and e commerce (ongoing) applications.
- Learned industry best practices in code architecture, testing, and deployment.

Skills Acquired:

- Front-end: React, Next.js, TypeScript, Redux, Tailwind CSS, Bootstrap.
- Tools: Git, GitHub, Vite, Vercel, Postman.
- Concepts: Responsive Design, Component Architecture, State Management.

Projects:

PostIt - Social Media Platform | **GitHub:** <https://github.com/dohahehe/PostIt> | **Live:** <https://post-it-bhg2.vercel.app/>
React, Tailwind CSS, React Query, REST API

- Full-featured social platform with authentication, posts, comments, and profiles.
- Real-time updates, responsive design, deployed on Vercel.
- Features: User auth, post management, commenting system, profile customization.

FreshCart - E-Commerce Platform | **GitHub:** <https://github.com/dohahehe/FreshCart> | **Live:** <https://shop-it-orpin.vercel.app/>
Next.js 15, TypeScript, Tailwind CSS, NextAuth.js, React Query, JWT, React Hook Form, Zod, REST API

- Full-featured e-commerce platform with authentication, product browsing, cart management, and wishlist functionality.
- Real-time updates, responsive design, deployed on Vercel.
- Features: User authentication, product search and filtering, shopping cart with quantity management, user reviews with ratings, order history tracking, profile management.

Additional Mini Projects

Game Hub - Game Discovery Platform | **GitHub:** <https://github.com/dohahehe/Game-Hub> | **Live:** <https://dohahehe.github.io/Game-Hub/>
JavaScript, Bootstrap, HTML5, CSS3, FontAwesome, RapidAPI

- Modern web application for discovering and exploring free-to-play games.
- Advanced filtering by genre, real-time search with debouncing, responsive design.
- Features: Game discovery, genre filtering, modal details, infinite-scroll pagination.

Weather App | **GitHub:** <https://github.com/dohahehe/Weather-App> | **Live:** <https://dohahehe.github.io/Weather-App/>

Bootstrap, JavaScript, WeatherAPI, Geolocation API

- Sleek, responsive weather application providing real-time conditions and forecasts worldwide.
- Geolocation support, city search, multi-day predictions, beautiful UI with weather icons.
- Features: Real-time weather data, geolocation, city search, responsive design, error handling, loading states.

Summer Intern, Suez Canal Authority

August 2024 – September 2024

React Web Developer trainee, Digital Egypt Pioneers Initiative (DEPI)

September 2024 – January 2025

- Completed an intensive government-sponsored training program focused on **web development technologies including HTML5, CSS3, JavaScript (ES6+), React.js, and Node.js.**
- Gained hands-on experience through **practical projects**, including developing a fully functional **online booking and reservation system** with responsive design and user authentication.
- Collaborated in a **team-based environment**, applying **Agile methodologies** and version control (Git/GitHub) for project management.
- Enhanced problem-solving, UI/UX design implementation, and API integration skills, aligning with industry best practices.

Web Developer Certificate, Udacity

March 2023 – May 2025

- Completed training focused on the **fundamentals of HTML5 and CSS3.**
- Gained practical skills in **structuring webpages, styling elements, and creating responsive layouts.**
- Built simple static web pages to strengthen understanding of **web design principles and user interface basics.**

EDUCATION

Bachelor of Computer Science in Software Engineering

Suez Canal University - September 2021 – July 2025

- GPA: 3.19 / 4.0
- Graduated with **Excellence with Honors.**
- Coursework included **Software Engineering Principles, Web Development, Database Systems, Algorithms, and Data Structures.**
- Strengthened expertise in **full-stack development, teamwork, Agile methodologies, and problem-solving** through academic and project work.
- Graduation Project: **"Yalla Eat"** an Egyptian food delivery and reservation platform inspired by Talabat, built with React.js on the front end and supported by backend APIs. Achieved **A+** for **implementation, documentation, and presentation.**

IGCSE

September 2019 - September 2021

LANGUAGES

English, Arabic
